Perkins

(Continued From Page 1C)

"I'd run for four months, then get a virus and be off for four months," he recalled. "I've been healthy for a year now and I'm starting to come around."

His winning time was the slowest since the 1974 race when Philip Ndoo of Kenya finished in 1:18:03, but comparisons are inconclusive. This year's course is a full 15 miles, compared to the 14.7 of last year, and Perkins was not given the challenge that runners need to put forth their best.
